

Aerial view of Pepperpots

This view shows the Ellis Building and car park in the top left hand corner. The site is essentially the narrow strip of land bounded by the trees running diagonally across the aerial view.

The top Pepperpot can be seen close to the building, however the second one is hidden in the trees beyond the open field, at the bottom of the site.

Our campfire circle is also hidden from view in the trees, close to the lower part of the field.
